Vol. XI

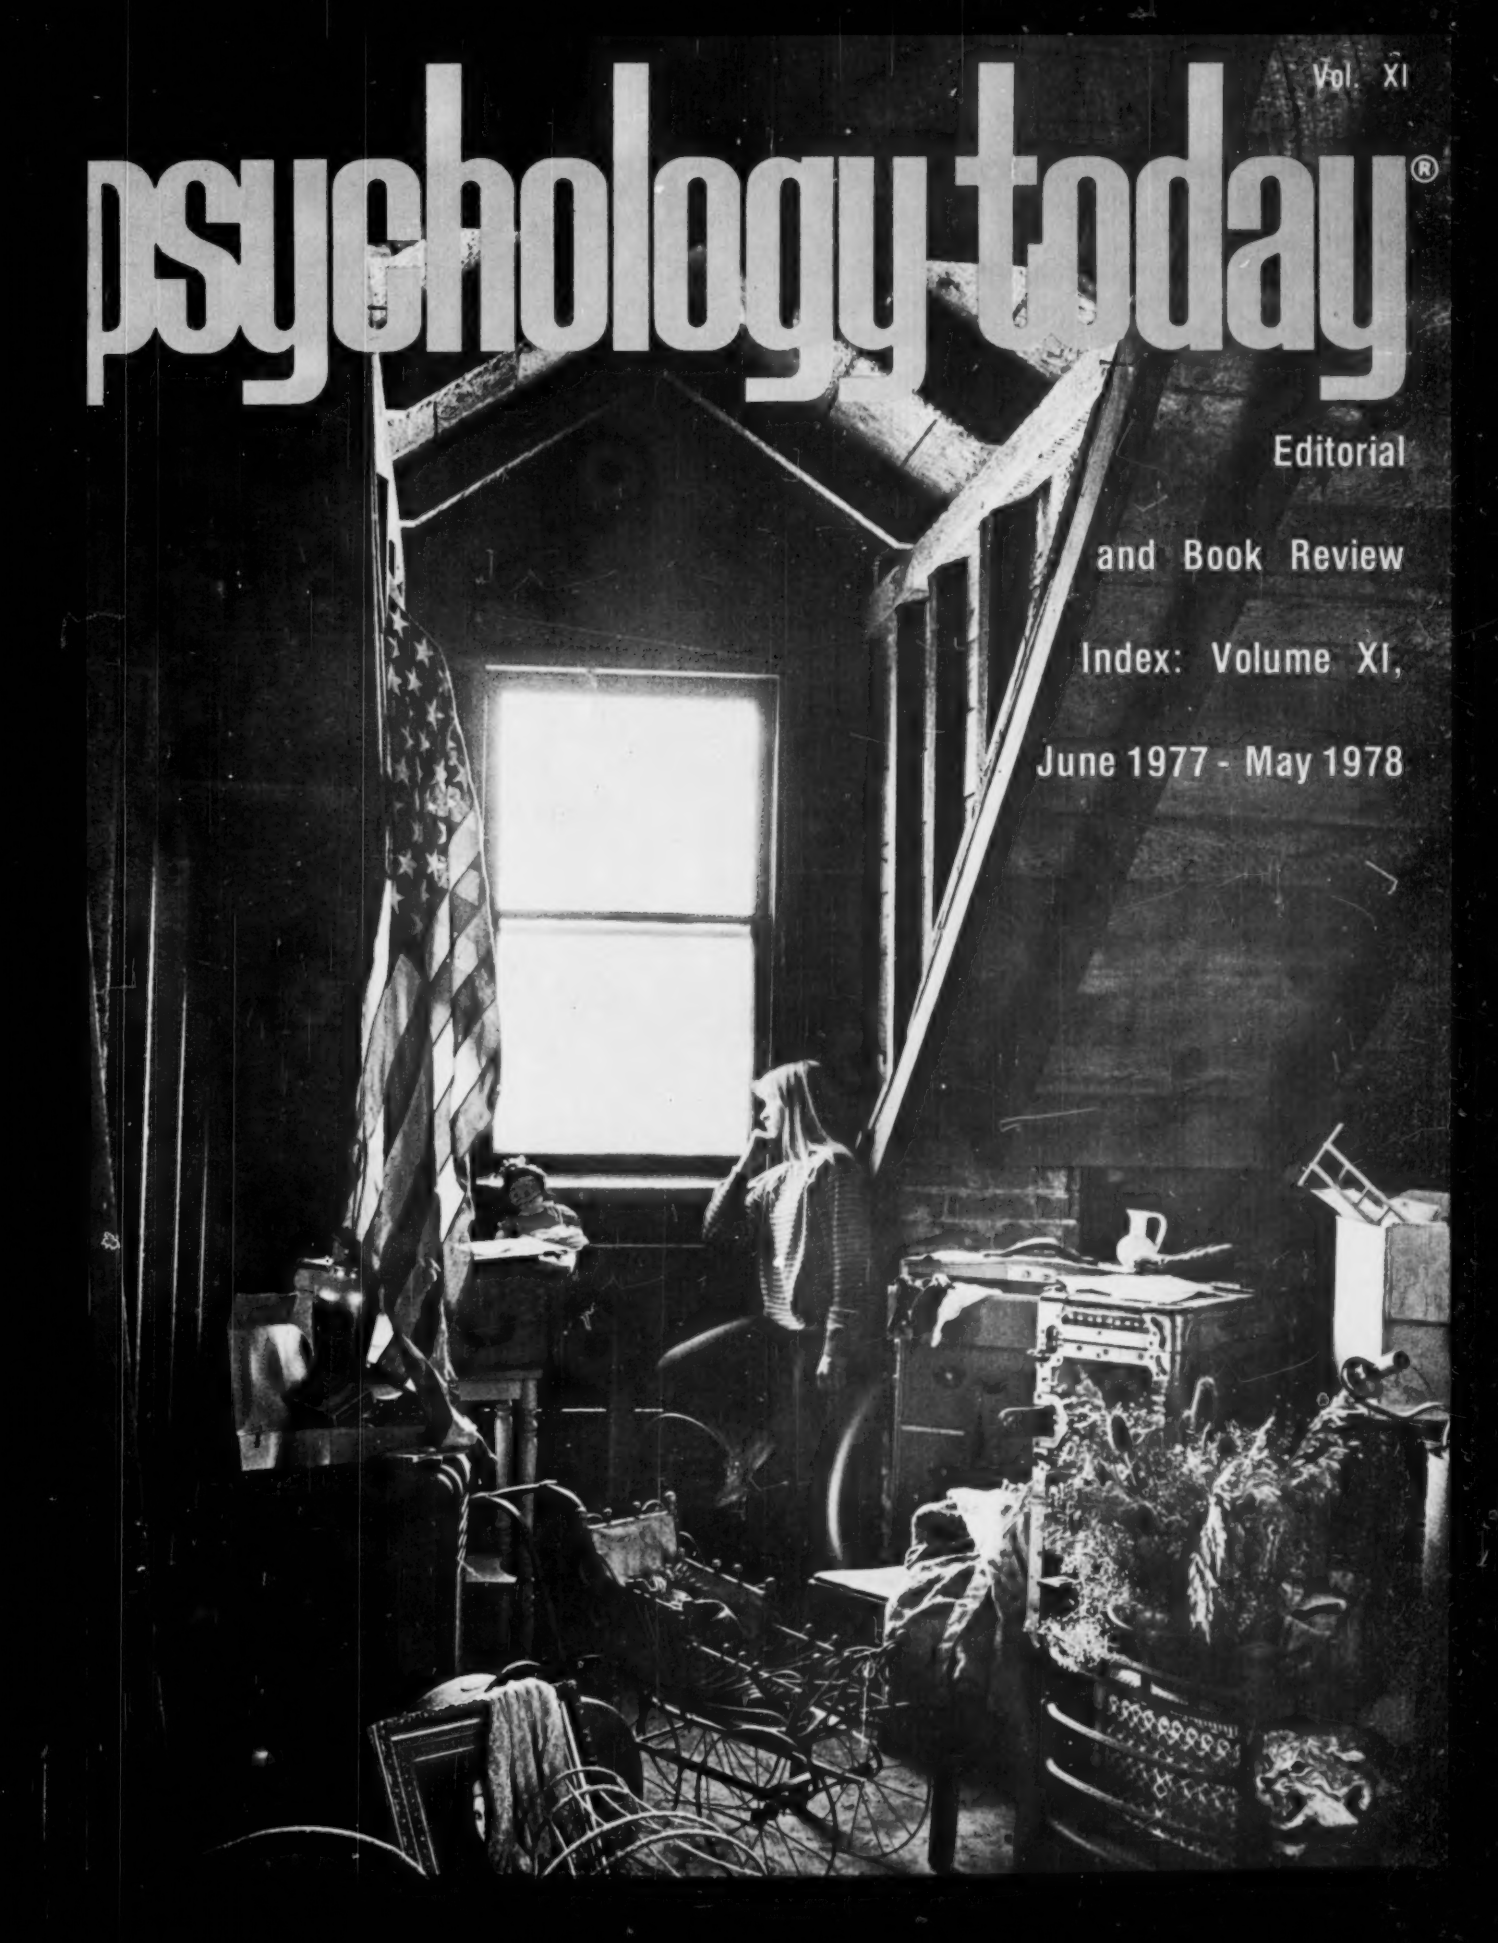
# psychology today®

Editorial

and Book Review

Index: Volume XI,

June 1977 - May 1978



**THIS INDEX. . .** consists of two parts; an Editorial Index and a Book Review Index, both of which reference the entire twelve-issue volume noted on the Index cover. Both Indexes are single continuous listings of titles, authors and topics arranged in alphabetical order. Each index entry gives the item title, its author(s), the magazine department in which the item appeared, the month and year of issue and the page number on which the item begins. When more than one item appears under a single index entry, the items are arranged in inverse chronological order, most recent item first. In particular, the

EDITORIAL INDEX references all main articles, regular columns and features including Newsline and Letters. Letters pertaining to a particular item are listed under the item's title entry. Author replies are listed under the author's name. And the

BOOK REVIEW INDEX references all Book Reviews, Review Briefs and articles that dealt primarily with books and literature. Entries are by book title, book author, book reviewer and subject insofar as could be determined from the review itself. Books are also classified as to Autobiographies, Biographies, Children's Literature, Fiction and Science Fiction. Letters pertaining to book reviews are listed under the book title entry.

Compiled and Published by the Falkenberg Press, Box 2228, Falls Church, Virginia, 22042. All rights reserved by the publisher including the right of reproduction by any means for any purpose. Published and distributed by special permission of

Vol. XII

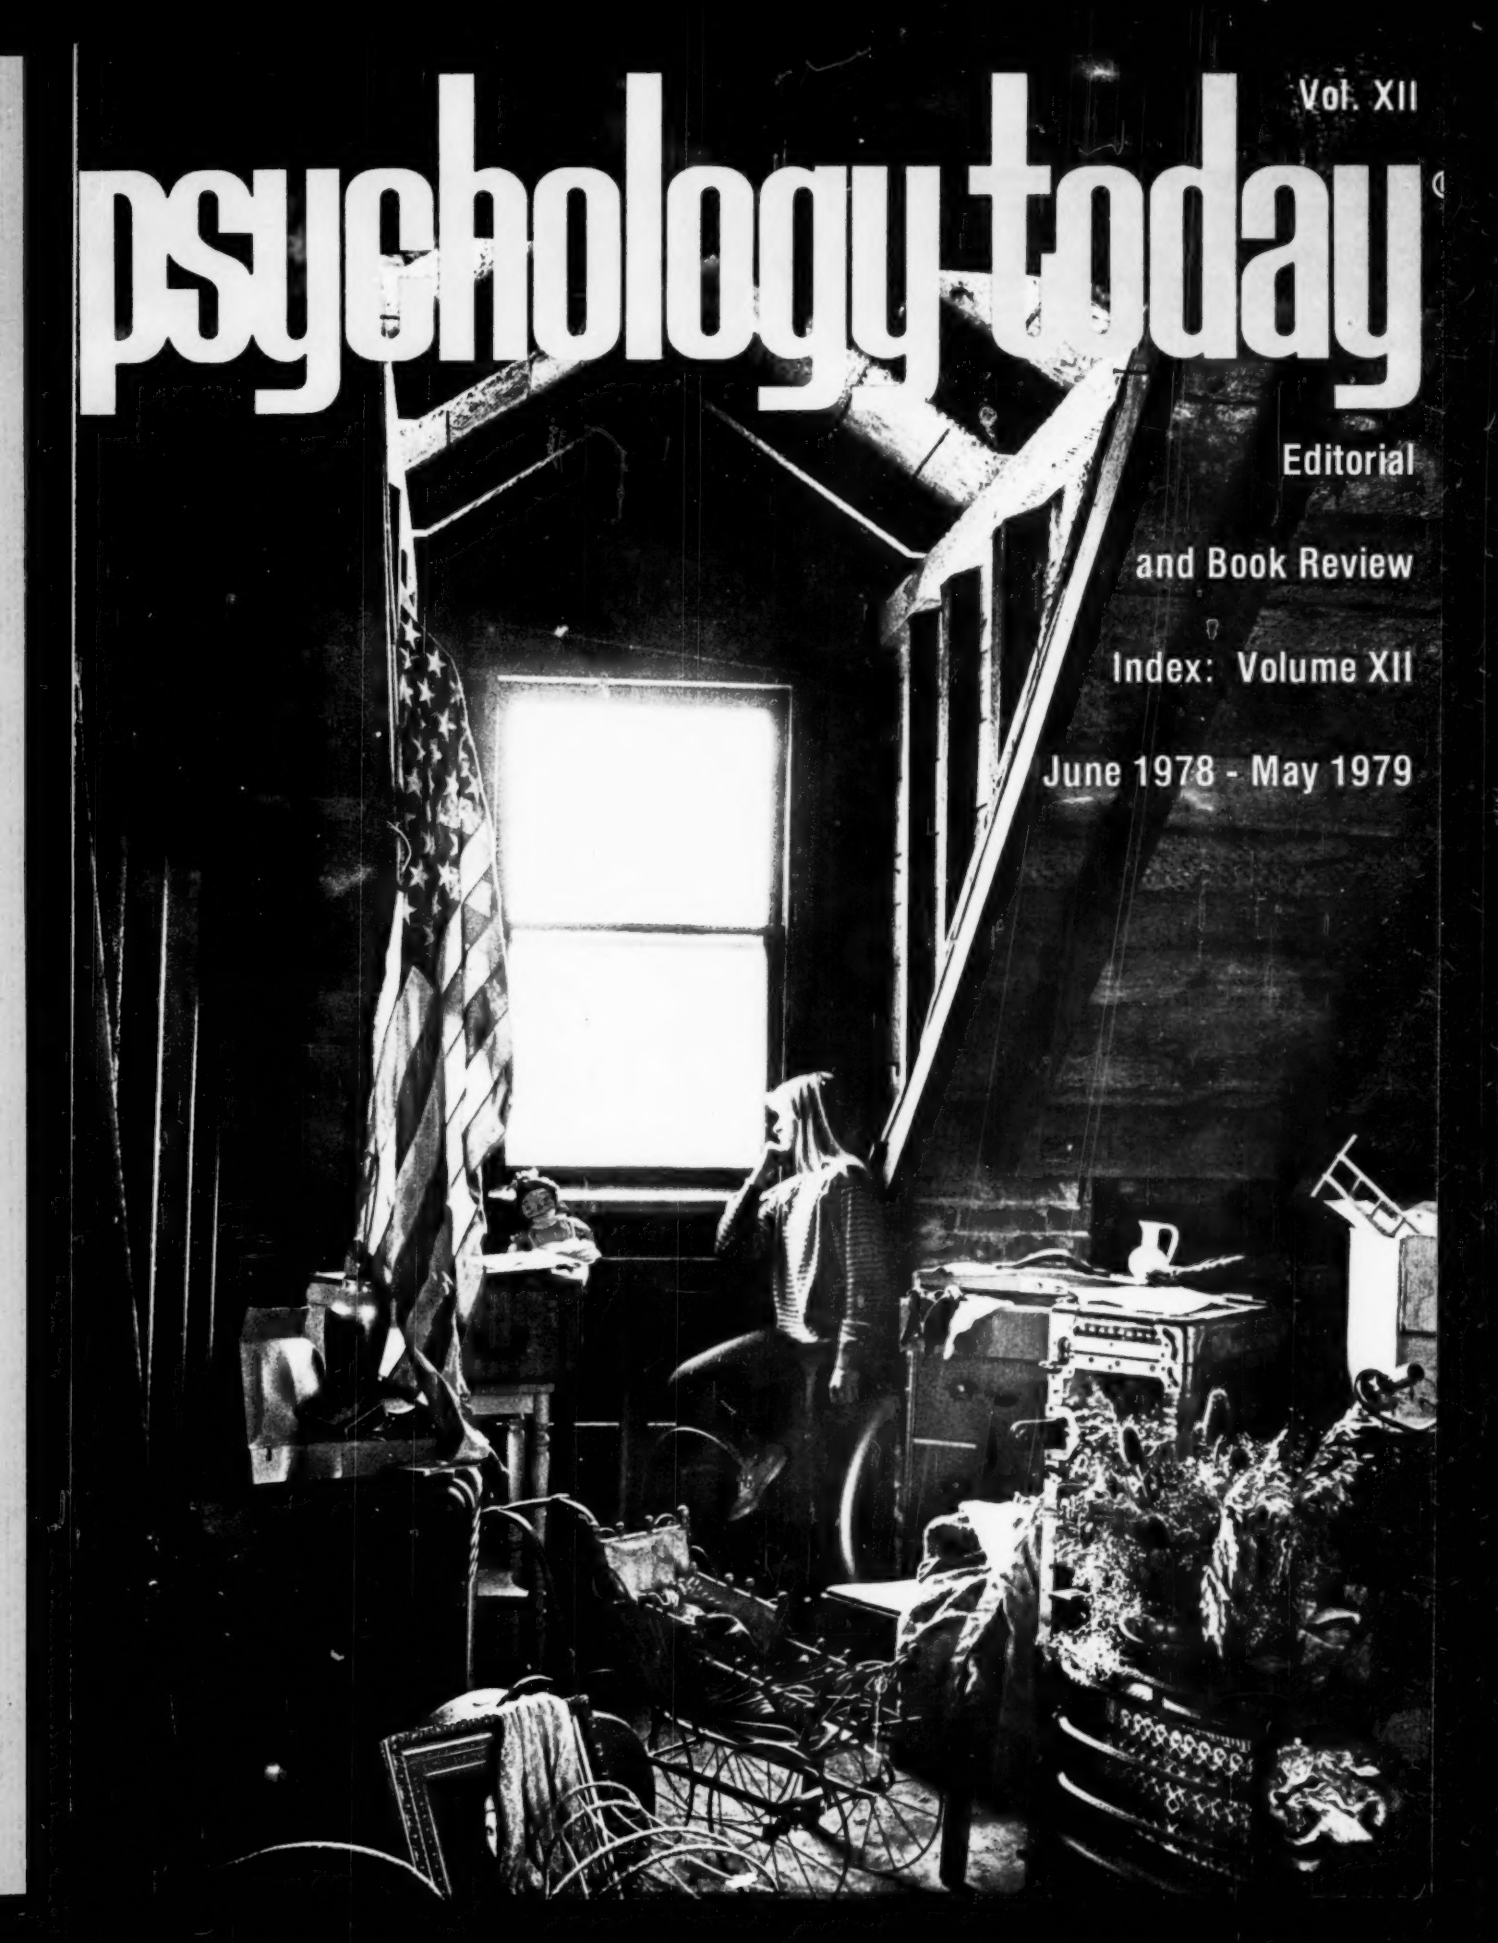
# psychology today

Editorial

and Book Review

Index: Volume XII

June 1978 - May 1979



# THIS INDEX...

consists of two parts; an Editorial Index and a Book Review Index, both of which reference the entire twelve-issue volume noted on the Index cover. Both Indexes are single continuous listings of titles, authors and topics arranged in alphabetical order. Each index entry gives the item title, its author(s), the magazine department in which the item appeared, the month and year of issue and the page number on which the item begins. When more than one item appears under a single index entry, the items are arranged in inverse chronological order, most recent item first. In particular, the

EDITORIAL INDEX references all main articles, regular columns and features including Newsline and Letters. Letters pertaining to a particular item are listed under the item's title entry. Author replies are listed under the author's name. And the

BOOK REVIEW INDEX references all Book Reviews, Review Briefs and articles that dealt primarily with books and literature. Entries are by book title, book author, book reviewer and subject insofar as could be determined from the review itself. Books are also classified as to Autobiographies, Biographies, Children's Literature, Fiction and Science Fiction. Letters pertaining to book reviews are listed under the book title entry.
